七、写作题目与范文（本次考试漫画题，三套卷通用）

题目：The impact of social networking websites on reading（漫画：I love reading. I read about 3 hours a day. My favorite book is Facebook.）

范文： The picture describes a conversation between two people, one of them said: "I read about 3 hours a day. My favorite book is Facebook." The picture intends to inform us that the Internet has exerted an important influence on reading for the modern citizens. The phenomenon involves many factors, which can be listed as follows. To begin with, with the rapid development of scientific technology, the Internet has become indispensable in our daily life. Undoubtedly, it provides people with many advantages and makes our life more comfortable and efficient, including the way of reading. What's more, it is a more advanced way to get information needed by people, and an efficient way to search for materials. "I have hardly ever bought any books since 2003. I have been reading online in recent years," said professor Wang from Peking University. Every coin has two sides, reading in social networking websites is no exception. Admittedly, there is false and useless information on the social networking websites; it is advisable that we read more critically and carefully.

八、翻译参考译文（三主题，卷次对应存疑）

翻译一：中国产业升级（一说为卷一/第1套）

参考译文（新东方版）： A decision has been made recently by Chinese government to upgrade its industrial structure, which now covers the manufacturing of high-speed trains, ocean-going vessels, robots and even airplanes. Not long ago, China won a contract to build a high-speed rail in Indonesia; another one was signed with Malaysia to provide the latter with high-speed trains, both proving that Chinese products have gained credibility and are enjoying increasing popularity all around the world. Cost

being paid, Chinese industry does contribute to eliminating domestic poverty and increasing job opportunities abroad, which deserves praise. The next time you go shopping, check the place of origin of your purchase, which is most probably from China.

翻译二：中国减贫（一说为卷二/第2套）

参考译文（中国日报版）： China is playing an increasingly important role in helping the international community in the process of eradicating extreme poverty by 2030. Since the implementation of reform and opening up in the late 1970s, China has helped as many as 400 million people out of poverty. In the next five years, China will provide assistance to other developing countries in poverty reduction, education development, agricultural modernization, environmental protection, health care and so on. China has made remarkable progress in poverty alleviation, and it has made unremitting efforts in promoting economic growth. This will encourage other poor countries to cope with their own development challenges. These countries can learn from China's experience in seeking the path of development with their own characteristics.

翻译三：中国父母教育观（一说为卷三/第3套）

参考译文（新东方版）： Parents in China are always trying to help their children, even to make the most important decision for them, regardless of what the children really want, because parents believe it's all for the benefit of their children. This has led to the result that the children's growth and education tend to give way to their parents' wishes. Once the parents decide to sign up an afterschool class for their children in order to increase their chance of being admitted to a good school, they will stick on their decision, even their children have no interest in it at all. In America, however, parents tend to respect their children, especially when making decisions. Perhaps it is commendable that Chinese parents attach great importance to education, but they should learn from American parents on how to balance the relationship between parents and children.
