五、写作范文（第1套：在线教育 e-learning）

Directions: For this part, you are allowed 30 minutes to write a short essay on e-learning. Try to imagine what will happen when more and more people study online instead of attending school. You are required to write at least 150 words but no more than 200 words.

参考范文（有道考神团队版）： Currently, an increasing number of people begin to use Internet to take courses and acquire knowledge. Online learning is booming all around the world. It is providing many options with learners in terms of time, locations, subjects and costs. Online learning greatly promotes learners' studying efficiency and teachers' productivity. As a result, updated knowledge will reach those students in isolated areas at a higher speed, which can make many of them keep pace with the time. Additionally, students can decide their learning location and time much more freely.

六、翻译参考译文（本次三题，多题多卷）

翻译题1 旗袍 (Qipao)： Qipao, as an exquisite Chinese clothing, originates from China's Manchu Nationality. In the Qing Dynasty, it was a loose robe specially for the royal women. In the 1920s, influenced by Western clothing, it embraced many changes, for example, narrower the cuffs and shorter the dress. These changes enabled Qipao to fully express women's beauty. Nowadays, Qipao quite often appears on world-class fashion shows. It is usually the first choice for Chinese women as they attend social parties. Meanwhile, many Chinese brides will select it as their wedding dress. Some influential personalities even suggest making it as the national costume for Chinese women.

翻译题2 创新 (Innovation, 本套阅读/翻译关联主题)： China's innovation is flourishing faster than ever before. In order to surpass developed countries on

science and technology as soon as possible, China has sharply increased research and development fund. Chinese universities and institutes are actively doing innovative researches, covering various fields of high technology, from big data to biochemistry, and from new energy to robots. They are also cooperating with science and technology parks in different places, so as to commercialize their fruits of innovation. In the meantime, to adapt to the changing foreign and domestic market, and to satisfy the growing demand, Chinese entrepreneurs are also making pioneering efforts to innovate their products and business models.

翻译题3 深圳 (Shenzhen) : Shenzhen is a newly-developed city in Guangdong Province, China. Before the reform and opening up, it was no more than a fishing village with a population of just over 30,000. In the 1980s, the Chinese government established Shenzhen special economic zone to pilot the socialist market economy. Today, Shenzhen boasts a population of more than 10 million, and the whole city has changed dramatically. By 2014, the per-capita GDP of Shenzhen has reached 25,000 USD, which would rival that of some developed countries. In terms of comprehensive economic strength, Shenzhen is listed as a top-tier city in China. Thanks to its unique position, it is an ideal place for entrepreneurs from home and abroad to start businesses.
