52	B	No duplicate is to be found in any other place
53	D	social change
54	A	A place where women could work more efficiently
55	B	Many of its central features are no different from those of the 1920s

五、写作范文 (第2套: 虚拟世界 living in the virtual world)

Directions: For this part, you are allowed 30 minutes to write a short essay on living in the virtual world. Try to imagine what will happen when people spend more and more time in the virtual world instead of interacting in the real world. You are required to write at least 150 words but no more than 200 words.

参考范文: People nowadays use social networking sites very frequently, such as Weibo and Wechat, which have made us more connected than ever. Yet for all this close contact, we are becoming more socially awkward. The harm of replacing real-life contact with virtual conversation, in my opinion, involves two aspects: it

made us put on masks and hold up shields. In a virtual world, we tend to create an image that rarely looks like us. We post messages or pictures to show we are humorous, with a good taste, and living a fabulous life. As a result, we fail to present our real self and dare not to be ourselves. Another unpleasant thing about virtual conversation is that it encourages unimaginable violence of language. The Internet has become a shield in many ways, exempting us from the consequence we should take responsibility for even though we make dreadful and malicious comments sometimes. This undoubtedly mins the quality of social interaction that we need as human beings. All in all, if we spend too much time interacting virtually, we will dedicate little effort to real-world bonding. Consequently, our interpersonal relationship weakens gradually, and we will end up with unprecedented alienation.

六、翻译参考译文（本次三题，多题多卷）

翻译题1 旗袍 (Qipao) : Qipao, as an exquisite Chinese clothing, originates from China's Manchu Nationality. In the Qing Dynasty, it was a loose robe specially for the royal women. In the 1920s, influenced by Western clothing, it embraced many changes, for example, narrower the cuffs and shorter the dress. These changes enabled Qipao to fully express women's beauty. Nowadays, Qipao quite often appears on world-class fashion shows. It is usually the first choice for Chinese women as they attend social parties. Meanwhile, many Chinese brides will select it as their wedding dress. Some influential personalities even suggest making it as the national costume for Chinese women.

翻译题2 创新 (Innovation) : China's innovation is flourishing faster than ever before. In order to surpass developed countries on science and technology as soon as possible, China has sharply increased research and development fund. Chinese universities and institutes are actively doing innovative researches, covering various fields of high technology, from big data to biochemistry, and from new energy to robots. They are also cooperating with science and technology parks in different places, so as to commercialize their fruits of innovation. In the meantime, to adapt to the changing foreign and domestic

market, and to satisfy the growing demand, Chinese entrepreneurs are also making pioneering efforts to innovate their products and business models.

翻译题3 深圳 (Shenzhen, 本套翻译题) : Shenzhen is a newly-developed city in Guangdong Province, China. Before the reform and opening up, it was no more than a fishing village with a population of just over 30,000. In the 1980s, the Chinese government established Shenzhen special economic zone to pilot the socialist market economy. Today, Shenzhen boasts a population of more than 10 million, and the whole city has changed dramatically. By 2014, the per-capita GDP of Shenzhen has reached 25,000 USD, which would rival that of some developed countries. In terms of comprehensive economic strength, Shenzhen is listed as a top-tier city in China. Thanks to its unique position, it is an ideal place for entrepreneurs from home and abroad to start businesses.
