五、写作范文 (第3套: 机器人 the use of robots)

Directions: For this part, you are allowed 30 minutes to write a short essay on the use of robots. Try to imagine what will happen when more and more robots take the place of human beings in industry as well as people's daily lives. You are required to write at least 150 words but no more than 200 words.

参考范文 (节选) : It is held by some people that knowledge is power, especially scientific and technological knowledge. Science and technology are the motive power of the social development, which constitute a primary productive force. The use of robots is the produce of development of science and technology. People's views on the use of robots vary from person to person. Some hold that human life cannot continue without the use of robots. For many years, human society has developed with the use of science and technology.

六、翻译参考译文（本次三题，多题多卷）

翻译题1 旗袍 (Qipao) : Qipao, as an exquisite Chinese clothing, originates from China's Manchu Nationality. In the Qing Dynasty, it was a loose robe specially for the royal women. In the 1920s, influenced by Western clothing, it embraced many changes, for example, narrower the cuffs and shorter the dress. These changes enabled Qipao to fully express women's beauty. Nowadays, Qipao quite often appears on world-class fashion shows. It is usually the first choice for Chinese women as they attend social parties. Meanwhile, many Chinese brides will select it as their wedding dress. Some influential personalities even suggest making it as the national costume for Chinese women.

翻译题2 创新 (Innovation) : China's innovation is flourishing faster than ever before. In order to surpass developed countries on science and technology as soon as possible, China has sharply increased research and development fund. Chinese universities and institutes are actively doing innovative researches, covering various fields of high technology, from big data to biochemistry, and from new energy to robots. They are also cooperating with science and technology parks in different places, so as to commercialize their fruits of innovation. In the meantime, to adapt to the changing foreign and domestic market, and to satisfy the growing demand, Chinese entrepreneurs are also making pioneering efforts to innovate their products and business models.

翻译题3 深圳 (Shenzhen) : Shenzhen is a newly-developed city in Guangdong Province, China. Before the reform and opening up, it was no more than a fishing village with a population of just over 30,000. In the 1980s, the Chinese government established Shenzhen special economic zone to pilot the socialist market economy. Today, Shenzhen boasts a population of more than 10 million, and the whole city has changed dramatically. By 2014, the per-capita GDP of Shenzhen has reached 25,000 USD, which would rival that of some developed countries. In terms of comprehensive economic strength, Shenzhen is listed as a

top-tier city in China. Thanks to its unique position, it is an ideal place for entrepreneurs from home and abroad to start businesses.
