五、翻译参考译文 (Translation)

第1套：私家车 / 汽车 (来源：兔兔英语 22en、可可英语 kekenet、新东方 PDF file.xdf.cn)

真题：过去，拥有一辆私家车对大部分中国人而言是件奢侈的事。如今，私家车在中国随处可见。汽车成了人们生活中不可或缺的一部分，他们不仅开车上下班，还经常驾车出游。有些城市的汽车增长速度过快，以至于交通拥堵和停车位不足的问题日益严峻，这些城市的市政府不得不出台新规，限制上路汽车的数量。由于空气污染日益严重，现在越来越多的人选择购买新能源汽车，中国政府也采取了一些措施，支持新能源汽车的发展。

参考译文： In the past, owning a private car was a luxury for most Chinese people. Nowadays, private cars can be seen everywhere in China. Cars have become an indispensable part of people's lives. They not only drive to and from work but also frequently go on trips by car. In some cities, the growth rate of cars has been so rapid that issues of traffic congestion and insufficient parking spaces have become increasingly severe. The municipal governments of these cities have had to introduce new regulations to limit the number of cars on the roads. Due to the worsening air pollution, an increasing number of people are now opting to buy new energy vehicles. The Chinese government has also taken some measures to support the development of new energy vehicles.

第2套：高铁 (来源：武汉新东方 wh.xdf 第2套页)

参考译文： China now has the largest and fastest high-speed rail network in the world. The speed of the CRH (China Railway High-Speed) train will continue to increase and more cities will build high-speed rail stations. The CRH train has greatly reduced people's travel time. Compared with the airplane, the outstanding advantage of the CRH train is punctuality, because it is basically not affected by weather or traffic control. It has transformed the way people live and become the favorite option for business travelers today. More and more people also travel by CRH train during holidays. Many young people choose to work in one city but live in a nearby one since they can commute by CRH train every day.

第3套：自行车 / 共享单车 (来源：武汉新东方 wh.xdf 第3套页)

参考译文： Bicycle used to be the leading means of transportation in China's cities and villages, and China was once called "the Kingdom of Bicycles". Nowadays, with traffic congestion and air pollution becoming more and more serious in cities, riding a bicycle is becoming popular again. Recently, China's entrepreneurs have combined mobile Internet technologies with bicycles and invented the business model of bike-sharing. The appearance of shared bikes has made it more convenient for people to get around, and people can ride bikes at any time only with the help of a mobile phone. To encourage people to travel by bike, many cities have built bike lanes. Now, more and more Chinese people like exercising by riding bikes.

六、写作范文 (Writing)

第1套: The Importance of Building Trust Between Employers and Employees (来源: 可可英语 kekenet)

It is an undeniable fact that trust can lay a solid foundation for commercial activities. Therefore, building trust between employers and employees plays a crucial role in boosting an organization. To begin with, as the saying goes, the best bosses understand the art of delegation. If a boss believes in his people and tries his best to delegate instead of micromanaging, this kind of belief can drive him to create an environment where employees would have more passion for work and work more efficiently. Next, with trust, employers and employees can achieve mutual consensus, build harmonious cooperation and have effective communication, which is beneficial to creating a pleasant working atmosphere. In this way, not surprisingly, the two parties can directly promote the rapid progress of the organization and indirectly spur continuous development of the individuals. Taking into account what we have discussed above, we may safely arrive at a conclusion that it is sensible for both employers and employees to keep in mind that mutual trust contributes to realizing a win-win situation.

第2套: The Importance of Building Trust Between Teachers and Students (来源: 武汉新东方 wh.xdf 第2套页)

A good relationship between a teacher and a student can have a major influence on a kid's development, and trust is crucial and indispensable in maintaining the relationship. To begin with, only when a student believes in his or her teacher is he or she willing to learn from the teacher or look to the teacher for guidance and support. In reality, too many students are weary of study and even drop out of school only because they dislike their teachers, which may transform their whole life. Besides, a teacher who has the full trust of his or her students is more motivated to help them improve the consciousness and initiative of learning, which in turn benefits the students most. However, the credibility between teachers and students is not something that can be built in a day. On the one hand, teachers should comprehend the students' actual demands and offer timely help. On the other hand, students should always be respectful to their teachers. All in all, trust in a teacher-student relationship is a must to achieve effective teaching and learning.

第3套: The Importance of Building Trust Between Businesses and Consumers (来源: 武汉新东方 wh.xdf 第3套页)

Today, in the context of this era featured by increasing commercialization and digitalization, mutually-trusted relations between businesses and consumers appear to be particularly important. As for me businesses should take a leading role in establishing the trust relationship: to be honest with their consumers. Firstly, if a business has a dishonest attitude toward its customers, the customers will lack purchasing confidence in its goods or services, which will bring huge economic

loss to the business. What's worse, the adverse side effect of such dishonesty can endanger the business and it is impossible to recover. The collapse of Sanlu Milk Powder Company is a testament to this. Moreover, the incident of poisonous milk has exerted devastating consequences on the whole milk powder market. Besides, because of the proliferation of counterfeit goods, more consumers lose confidence in domestic products, and then they have no alternative but to resort to foreign brands, which is one reason why cross-border online shopping is gaining more and more popularity in China. Therefore, it is high time for us to strengthen the importance of maintaining trust between businesses and consumers to promote the healthy development of the whole social economy.
