50	C	
51	D	农业与环境 / 大农场
52	A	
53	D	
54	D	
55	B	

五、写作范文

题目 (第一套) : why students should be encouraged to develop effective communication skills

Living in an age when competition is becoming increasingly severe, students are generally encouraged to develop effective communication skills. These skills include both the management of body language and facial expressions while students are talking and the pace and emphasis of the speech flow.

The reasons why students should be encouraged to develop effective communication skills mainly lie in the following three respects. First of all, as a student, effective communication skills make our thoughts and ideas more easily understood by those around us and our talent would be more likely to be seen by others. Moreover, effective communication skills give us the ability to fulfill tasks more efficiently and solve problems more effectively. Last but not least, knowing the secrets of effectively delivering what we would like to express helps us make more friends.

To conclude, developing effective communication skills can not only render us outstanding easily but also lead us to success undoubtedly. With these skills, we will definitely become the one we have been dreaming to be.

六、翻译参考译文

题目（第一套）：港珠澳大桥

The 55-kilometre Hong Kong-Zhuhai-Macau Bridge is an extraordinary engineering feat. It is the world's longest sea-crossing transportation system combining bridges and tunnels, which joins the three cities of Hong Kong, Zhuhai and Macao, cutting the travelling time among them from 3 hours to 30 minutes. The reinforced concrete bridge with huge spans fully proves that China has the ability to complete the record-breaking mega-construction, and it will enhance regional integration and boost economic growth. It plays a crucial role in the overall plan to develop China's Great Bay Area, which China intends to turn into one rivaling those of San Francisco, New York and Tokyo in terms of technological innovation and economic prosperity.
