The bridge marks a huge progress in China's bridge construction, greatly facilitating the exchanges of both goods and people on both sides of the Yangtze River and playing a major role in the development of economy and the improvement of people's living condition.

六、写作范文

Directions: For this part, you are allowed 30 minutes to write an essay that begins with the sentence "Nowadays more and more people keep learning new skills to adapt to a fast-changing world." You can make comments, use examples, or use your personal experiences to develop your essay.

It is a truth universally acknowledged that we are living in a constantly changing world. What seemed absolutely right yesterday may prove wrong today. Therefore, it is essential for everyone to keep learning new skills, so they can keep up with the pace of modern world.

This mentality counts in almost every stage of our life. First, when a student keeps learning new skills, he/she always asks for more and desires to explore the unknown world. Therefore, there is an excellent chance that he/she stands out in peer groups. Second, in the workplace, office workers with such attitude generally finish his/her tasks in a higher quality, and they are more likely to climb up the ladder more quickly than their colleagues who content themselves with the skills they already have.

Besides, in our daily life, people who keep learning new skills are more positive, and everyone around them must be fond of making friends with them.

In all, we must keep learning new skills so as to adapt to the fast-changing world. On the one hand, we should make friends more with people who have such attitude, and let their positive energy influence us. On the other, we should bear in mind that what remains unchanged is change itself, so we should never stop learning new skills.
