五、翻译参考译文

原题：卢沟桥位于天安门广场西南15公里处，横跨永定河，是北京现存最古老的多拱石桥。卢沟桥最初建成于1192年，1698年重建，由281根柱子支撑。每根柱子上都有一头石狮。这些石狮的头、背、腹部或爪子上都藏有着更多的狮子。这些石狮生动逼真、千姿百态，是卢沟桥石刻艺术的精品。桥上的石狮不计其数，因而北京地区流传着“卢沟桥上的狮子——数不清”的说法。卢沟桥不仅以其美学特征著名于世，又被公认为石桥建筑史上的一座丰碑。

参考译文 (要点)： The Lugou Bridge (Marco Polo Bridge), located about 15 km southwest of Tian'anmen Square and spanning the Yongding River, is the oldest existing multi-arch stone bridge in Beijing. First built in 1192 and rebuilt in 1698, it is supported by 281 pillars, each topped with a stone lion; more lions are carved on the heads, backs, bellies or paws of these lions. Vivid and varied, they are masterpieces of the bridge's stone-carving art. So numerous are the lions that a local saying goes, "The lions on the Lugou Bridge are countless." Renowned for its aesthetic features, the bridge is also recognized as a monument in the history of stone-bridge architecture.

六、写作范文

Directions: For this part, you are allowed 30 minutes to write an essay that begins with the sentence "Nowadays more and more people choose to live an environmentally friendly lifestyle."

Nowadays more and more people choose to live an environmentally friendly lifestyle. They tend to produce less rubbish in their daily life and try to recycle anything that can be reused. Some even become enthusiasts and encourage more people around them to change their lifestyles into the more environmentally friendly ones.

Simon, one of my best friends, is a typical youngster who lives an environmentally friendly lifestyle. He tries not to buy products during the manufacture of which much pollution may be caused. After using up the goods he bought, he would always reuse the packages of the goods for other purposes. He also tries to reduce the pollution from human-made machines. No matter in very hot summer or in freezing cold winter, he never uses air conditioners. He believes that it does us good to stay in a natural environment and reducing the use of air conditioners can save more electricity as well.

As people's awareness of protecting and guarding the earth becomes stronger, an increasing number of people from different fields attend to live sustainably and eventually make the world a more worthy place to live.
