原文要点：随着经济与社会的发展，中国人口结构发生显著变化，逐步步入老龄化社会；为应对挑战，国家采取措施加大养老支持，改革社保制度、扩大覆盖面；鼓励社会团体提供服务。

With the development of economy and society, there has been a significant change in the population structure in China, gradually transitioning into an aging society. It is expected that China's elderly population will continue to increase, and the trend of population aging will become more obvious. To cope with various challenges brought about by population aging, the country is actively taking measures to strengthen support for elderly care. Through the reform of the social security system, the government has continuously increased social security funds and gradually expanded the coverage of social security in order to benefit more elderly people. Furthermore, the government encourages various social organizations to provide services for the elderly. Through the collaborative efforts of the government and social organizations, the elderly will live a happier life.

六、写作范文

作文题目：The importance of acquiring the basic knowledge（获取基础知识的重要性）

The Importance of Acquiring Basic Knowledge

As we all know, mastering good basic knowledge is an important step that every student must go through in the learning process, and it is crucial for students to master any subject. Therefore, we should fully realize the importance of mastering basic knowledge. Here's why.

First of all, without a solid foundation, it is impossible to understand more profound theories of knowledge, and it is impossible to advance to a higher level. Take English learning as an example, if we do not have a solid grasp of English grammar and vocabulary, we will not be able to effectively understand literary works and understand higher-level English concepts. Second, just as a building needs a solid foundation to support its structure, our academic success requires a solid grasp of the basics. From

personal experience, I clearly remember a deep understanding of foundational concepts paving the way for my success in challenging courses. Finally, no foundation, no progress. For the system of knowledge is interlinked, without a solid foundation, the knowledge system will be full of holes.

Therefore, I think it is very important for students to get a good basic knowledge.
