五、翻译 (汉译英) 参考译文

翻译第二篇: 多元化养老模式

原文要点: 中国步入老龄化社会, 养老受普遍关注; 多数人认为养老模式应多元化——建立更多养老机构、改进社区中心、鼓励居家自助养老、推行家庭与社会养老结合; 随着政府与社会投入增加, 设施升级、服务改善。

As China is facing an ageing society, there is a widespread concern over the issue of elderly care. What kind of care model for the elderly should be adopted is the most debated topic. The majority of people believe that the care model for the elderly should be diversified. More and better elderly service institutions can be established, community service centres can be improved, and self-care for the elderly at home can be encouraged through government guidance and social participation. It is also possible to promote a model of the elderly that combines family and social care. The continuous increase in government and social investment in services for the elderly will bring further improvements in care facilities, gradual enhancements in the quality of services and a more convenient and comfortable life with health and happiness for the elderly.

六、写作范文

作文题目: With their valuable skills and experience, elderly people can continue to make significant contributions to society. (老年人可继续为社会做贡献)

With their valuable skills and experience, elderly people can continue to make significant contributions to society. This view is accepted by more and more citizens as they witness firsthand the capabilities of these experienced individuals.

First of all, the older generation, especially highly skilled workers, is still irreplaceable for jobs that require extensive skills and expertise. Without them, it is highly possible that work quality and efficiency will be seriously affected. In addition, these senior citizens play a significant role in training or cultivating the young generation by passing down their valuable skills and experiences. Young people, benefiting from this mentorship, can directly contribute to their organizations and country. Finally, the elderly can even be part of think tanks, offering precious advice or suggestions to the management teams of firms or to the government, thus promoting development.

Therefore, recognizing the significance of elderly people and encouraging their active participation in society is crucial, rather than merely viewing them as individuals who should retire from active life.
