五、翻译参考译文（三套变体）

Variant 1: 徐霞客 (Xu Xiake)

原文：徐霞客是中国明代的著名地理学家，他花费了三十多年的时间游遍了大半个中国。他主要靠徒步跋涉，寻访了许多荒远偏僻的地区。他把自己的见闻和考察结果详细记录下来，为后人留下了珍贵的考察资料。他通过对许多河流的实地调查，纠正了文献中关于水源的错误。他还详细地描述了地形、气候等因素对植物的影响，生动地描绘了各地的名胜古迹和风土人情。他的考察记录由后人整理成了《徐霞客游记》，在国内外产生了广泛的影响。

参考译文： Xu Xiake was a famous geographer in the Ming Dynasty of China. He spent more than 30 years traveling across more than half of China. He explored many remote areas, mainly on foot. He wrote down his observations and investigation results in detail, leaving precious investigation materials for posterity. He corrected the mistakes about water sources in the literature through field investigations on many rivers. He also described in detail the effect of terrain, climate and other factors on plants, and vividly depicted the places of interest and local customs. His investigation records were compiled into The Travel Notes of Xu Xiake by later generations, which had a wide influence both at home and abroad.

Variant 2: 张骞 (Zhang Qian)

原文：张骞是中国第一个伟大的探险家。他不畏艰险，克服重重困难，两次出使西域，开通了同西亚和欧洲的通商关系，将中国的丝和丝织品运往西亚和欧洲，开拓了历史上著名的“丝绸之路”。同时，他又将西域的风土人情、地理文化以及特有物种等介绍到中原，极大地开阔了人们的视野。正如历史学家所指出的那样，如果没有张骞出使西域，就不可能有丝绸之路的开辟，也就不会有汉朝同西域或欧洲的文化交流。

参考译文： Zhang Qian was the first great explorer in China. Undaunted by dangers and difficulties, he made two diplomatic missions to the Western Regions and opened China's commercial relations with West Asia and Europe, shipping Chinese silk and silk goods to West Asia and Europe, and opening up the famous "Silk Road" in history. At the same time, he also introduced the local customs, geographical culture and unique species of the Western Regions to the Central Plains, which greatly broadened people's vision. As historians have pointed out, without Zhang Qian's missions to the Western Regions, the opening of the Silk Road would not have been possible, and there would not have been cultural exchanges between the Han Dynasty and the Western Regions or Europe.

Variant 3: 郑和下西洋 (Zheng He)

原文：郑和是中国历史上最杰出的航海家，在航海、外交、军事等诸多领域都表现出非凡的智慧和卓越才能。他曾七次率领庞大的船队远航，访问了西太平洋和印度洋的许多国家和地区，加深了中国同东南亚、东非的相互了解。郑和下西洋对中外的经济和文化交流起到了十分积极的推进作用，也为维护区域和平做出了巨大贡献。为了永远铭记郑和及其丰功伟绩，7月11日，即郑和首次率船队远航启程的日子，被定为中国的航海节。

参考译文：Zheng He, the most outstanding navigator in Chinese history, displayed extraordinary wisdom and exceptional talent in many fields such as navigation, diplomacy and military affairs. He commanded massive fleets on seven voyages to visit many countries and regions in the western Pacific and Indian Oceans, deepening mutual understanding between China and Southeast Asia and East Africa. Zheng He's voyages not only exerted a positive impact on promoting economic and cultural exchanges between China and foreign countries but also made enormous contributions to maintaining regional peace. To commemorate Zheng He as well as his remarkable achievements, July 11, the day when he embarked on his first expedition with the fleet, has been designated as China's Maritime Day.

六、写作范文（三套变体）

Variant 1: 容貌焦虑 (appearance anxiety)

Directions: ... begins with the sentence "People are now increasingly aware of the danger of 'appearance anxiety' or being obsessed with one's looks."

People are now increasingly aware of the danger of "appearance anxiety" or being obsessed with one's looks. In such a "face-judging" world, or a world of judging people by their appearance, many people, especially youngsters, have attached too much importance to their appearance. At the same time, people also come to realize the problems caused by appearance anxiety.

In my opinion, excessive appearance anxiety is harmful to both our physical and mental health. For one thing, in order to pursue so-called "beauty", some people are blindly dieting to lose weight, resulting in malnutrition, anorexia and other diseases; also some people regard cosmetic surgery as the quickest and the most effective way to make them more beautiful. However, in case cosmetic surgery fails, there is a price to pay. In fact, some people have already paid the price with their lives. For another, under the influence of the concepts such as "the perfect body" and "the golden ratio

of beauty", people tend to have self-doubt, thus putting all their energy into how to become good-looking, instead of focusing on study and work.

There is a saying that the desire to look attractive is universal. But remember that appearance is not the only standard to measure one's value, and a person's inner beauty outweighs his/her appearance.

Variant 2: 面临众多选择时做决定 (making a decision when faced with too many choices)

Directions: ... begins with the sentence "People are now increasingly aware of the challenges in making a decision when faced with too many choices."

People are now increasingly aware of the challenges in making a decision when faced with too many choices. For undergraduates, they have to decide whether they after graduation find a job, go abroad for further studies, start their own business, or pursue higher education at home. In order to achieve our desired goals and realize our dreams, everyone ought to choose the path which is suitable for himself. But sadly, the reality is not the case. Currently, a mass of college students just follow others' choices, ignoring their own features and other possibilities. This is partly due to the fact that most of them come from wealthy family, lacking the courage to explore the unknown world and confront the challenges, but also because modern people often live under peer pressure and feel safer when they follow suit. In all, measures are to be taken to prevent this trend from worsening. In doing so, parents, teachers, and social media should make joint efforts to promote the idea that everyone should make choices based on their own features.

Variant 3: 数字鸿沟 (digital gap)

Directions: ... begins with the sentence "People are now increasingly aware of the 'digital gap' or challenges the elderly face in a digital world."

People are now increasingly aware of the "digital gap" or challenges the elderly face in a digital world. Digitalization has become a prominent feature of current social changes in our country. Moreover, a worrisome point is that a fair number of the elderly still face the problem of "digital siege", which should attract increasing attention nowadays.

Personally speaking, there are two reasons accounting for this phenomenon. First and foremost, digital technology is rapidly updated and iterated in a short time so that it is difficult for most elderly people to keep their pace with the trend due to physical and intellectual limitations. In addition, the majority of digital technologies are based on the market needs of young people. Only when the aged learn the cumbersome intelligent operation can they be able to apply the technologies, which virtually raises the technical threshold of the old people's digital life.

According to statistics, our country is officially entering a moderately aged society. Therefore, we should spare no efforts to help the aged overcome the challenges and enjoy the benefits brought by the digitalization.
